RESEARCH EXPERIENCE

AREA Lab, University of California, Riverside

Graduate Research Assistant

Advisor: *Prof. Elaheh Sadredini*

Sep 2021 – Present

- Currently developing a framework to seamlessly integrate in-SRAM computing into existing computer systems for efficient and secure on-chip processing of pre- and post-quantum cryptography.
- Developed a bit-parallel modular multiplication algorithm with implicit shifting technology for efficient and secure in-SRAM computing of the NTT, optimizing performance on a low-overhead SRAM array.
- Designed a secure in-SRAM architecture for on-chip acceleration of the SHA-3 algorithm using lane-wise data alignment and in-place read/write strategy, achieving high energy and area efficiency with high throughput.
- Designed a secure in-SRAM architecture for on-chip acceleration of the AES algorithm using row-wise data alignment and SubBytes/ShiftRows stage fusion, achieving high energy and area efficiency.

Advanced Networking Technology Lab, Xidian University

Graduate Research Student

Advisor: *Prof. Huaxi Gu*

Sep 2018 – Jun 2021

- Developed a hardware-software co-design framework for efficient CNNs, leveraging weight reshaping and systolic array multiplexing with genetic algorithms for optimal hardware performance.
- Built a distributed inference system for accelerating CNNs using systolic array on FPGAs, with HLS for low-level hardware description and Aurora/Ethernet protocols for inter-board communication.
- Designed a flexible and compact $N \times N$ plasmonic switch topology with a dedicated configuration algorithm that ensures re-arrangeable non-blocking, making it ideal for managing mixed traffic in data centers.
- Designed a low-loss compact plasmonic router for mesh networks in optical Network-on-Chip, exhibiting lower insertion loss and a smaller footprint compared to other structures.

TEACHING EXPERIENCE

CS 213 Multiprocessor Architecture and Programming

Teaching Assistant

Instructor: *Prof. Elaheh Sadredini*

Sep 2022 – Dec 2022

- Led two discussion sessions of students' presentations.
- Held weekly office hours to answer students' questions.
- Graded homework and programming assignments.

OTHER EXPERIENCE

gem5 Boot Camp

Participant

Davis, USA

Jul 2022 – Jul 2022

- Simulated and analyzed the performance of computer architectures, and studied the behavior of different workloads and benchmark suites on various computer architectures.
- Evaluated the impact of different design choices on system performance, such as varying cache sizes or using different interconnect topologies, and explored the effects of different microarchitectural features.

Xilinx Summer Camp

Participant & Team Leader

Online

Jul 2020 – Aug 2020

- Developed an FPGA-based distributed platform for acceleration over Ethernet, with the mother board sending a file to a watched folder on the child board for immediate program execution. [[source](#)]

Microsoft Innovation Center

Intern

Xi'an, China

Jul 2017 – Aug 2017

- Explored the advancements and challenges in the evolution of cellular networks across generations, starting from the early analog systems to the 5G technology.
